Introduction/Abstract

Starting from Athens a new e-Poster format will be implemented. Authors that are selected for this type of presentation are requested to prepare a **PDF file** that will be used to be displayed onsite on the provided computers inside the e-Poster area.

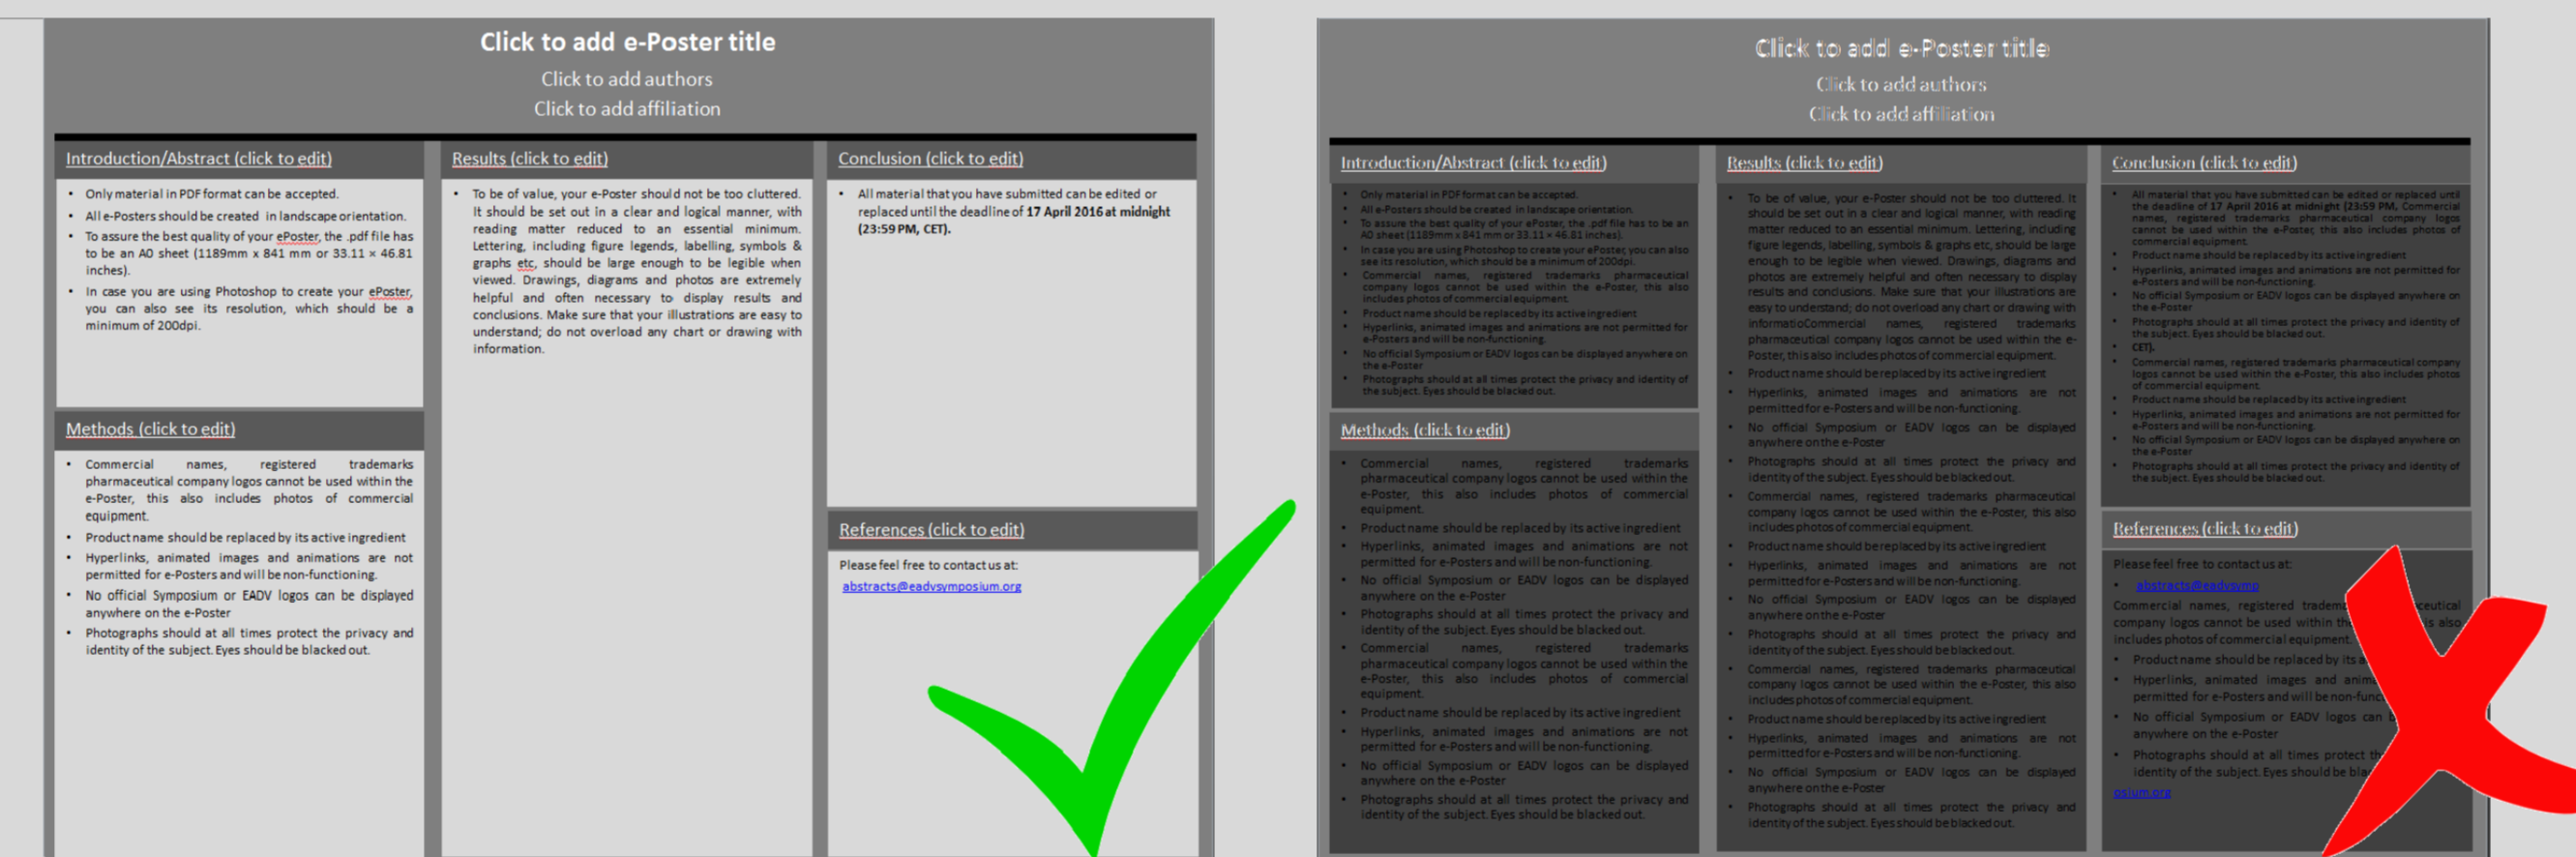

- Only material in **PDF** format will be accepted.
- All e-Posters should be created in landscape orientation.
- To assure the best quality of your e-Poster, we recommend that the .pdf file has the size of an A0 sheet (**1189mm x 841 mm or 46.81 x 33.11**).
- If you are using Photoshop to create your e-Poster, you will also be able to see the resolution, which should be a minimum of 200dpi.

Methods

- Commercial names, registered trademarks pharmaceutical company logos cannot be used within the e-Poster, this also includes photos of commercial equipment.
- Product names should be replaced by its active ingredient
- Hyperlinks, animated images and animations are not permitted and will be non-functioning
- No official Congress or EADV logos can be displayed anywhere on the e-Poster
- Photographs should at all times protect the privacy and identity of the subject. Eyes should be blacked out

Results

- To be of value, your e-Poster should not be too cluttered. It should be set out in a clear and logical manner, with reading matter reduced to an essential minimum. Lettering, including figure legends, labelling, symbols & graphs etc., should be large enough to be legible when viewed. Drawings, diagrams and photos are extremely helpful and often necessary to display results and conclusions. Make sure that your illustrations are easy to understand; do not overload any chart or drawing with information.
- Remember to consider contrasting colours. Use light coloured fonts on dark backgrounds and dark fonts on light backgrounds so that your viewer can see your text clearly.

Conclusion

- All material that you have submitted can be edited or replaced until the deadline of **15 September 2016 at midnight (23:59 PM, CET)**.
